For 40 years, Prati has been a world-wide leading manufacturer of professional quality presentation materials and stationery products and has been able to offer the finest and broadest selection.

All Prati Paris products are made from the highest quality materials for the professional and beautiful presentation of photographs, artwork and professional documents.

For Prati the presentation and preservation of artworks is most important. Prati premium papers and sheet-protectors are archival quality and acid-free for optimal presentation and protection of all documents.

Prati is the only manufacturer offering both high-end and low-end professional presentation materials such as refill books, presentation cases, portfolios and binders.

The loyalty and satisfaction of their customers comes from their commitment to the finest materials and the highest quality control standards. Computerised production processes, skilled craftsmanship and unsurpassed quality control enable Prati to guarantee their products and ensure that, in order to deserve the Prati logo, a product must be 100% perfect. This is why they offer a limited lifetime guarantee against manufacturing defects.

A few words from the founder.....

For more than 40 years, thousands and thousands of professionals have

been carrying our press-books on all continents, proving that they are the best of the world....

We agree with them!

But it is not by chance that we have been building this success for 40 years. Everyone knows that quality cannot be improvised, that quality is the result of extensive labour, where time has its place and function...

When choosing a Prati Press-book, you automatically join a refined club, the club of 'connoisseurs', of those who can at first glance identify a true quality product, a 'professional' product.

Welcome to the professional world of PRATI
